

You probably wonder about life from time to time. Like: why do I have a name? Why are people sometimes unfriendly? Do my parents really love me? Do I have to do something to be good enough? Why do we call the Earth our mother? Why am I alive? And where's my grandfather now that he's gone?

One truth does not exist! The answers in this book are open and come from the heart. They invite you to think and feel for yourself, finding your own answers from within. Learn how to connect with your body, your heart, and nature to find endless wisdom and support. There's more to life than meets the eye!

An honest, gentle, and optimistic book about the mysteries of life. For inquisitive children ages 7 years and up. But also for grown-ups!

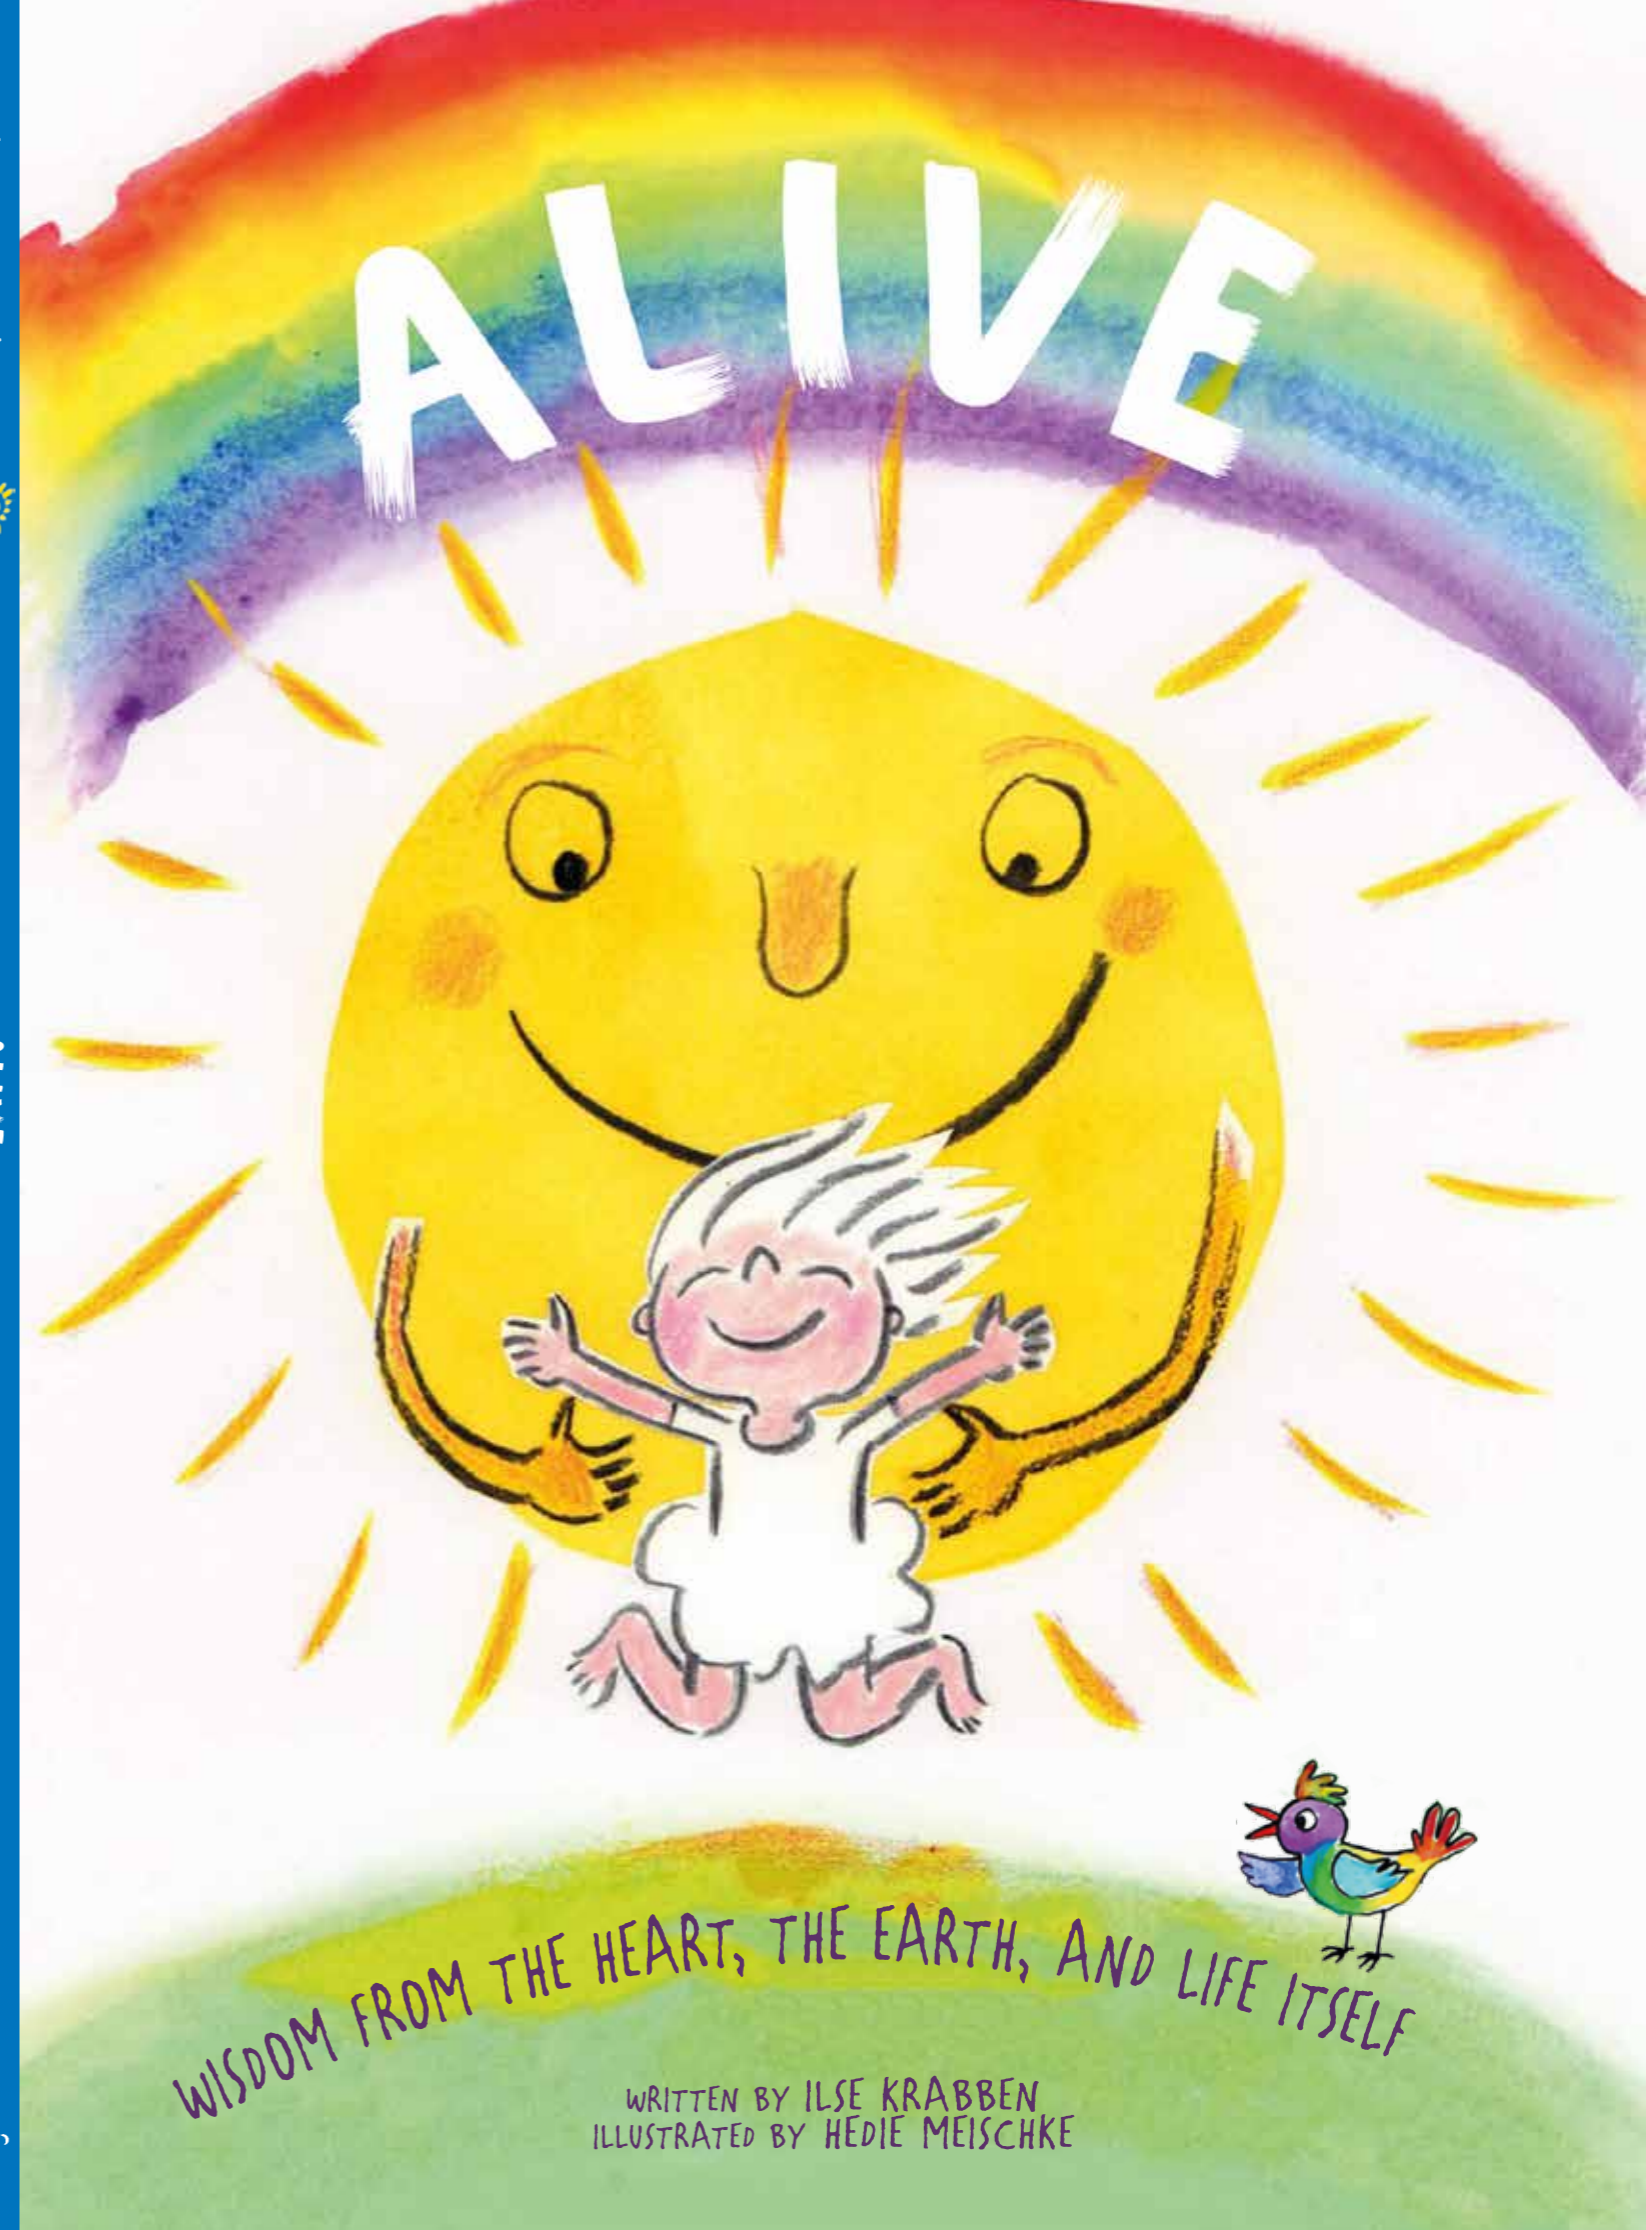

*"My son and I are reading Alive and it's such a wonderful help for beautiful conversations with him."
– S. Scholte, mother and founder of Spinwaves and Spinwaves Lab*
